

## **Low back pain in adolescent female rowers**

Expressions of interest are sought from students interested in undertaking a thesis option for the Master of Physiotherapy to be involved with this project on Low back pain in adolescent female rowers.

The candidate will examine the interrelationships between low back back physical activity and sports related training in female rowers. The project would be appropriate for students in musculoskeletal physiotherapy but is also applicable to students interested in sports physiotherapy.

### **The Masters in Physiotherapy candidate**

The successful candidate will be currently enrolled in the MPHTY degree at the School of Physiotherapy, University of Otago

### **Funding opportunities**

The opportunity for funding opportunities will be explored with the candidate on a case by case basis.

Interested candidates should send a one page letter detailing their research interests, previous experience, and relevant skills, with their CV by email to:
